ONE -STOP
BUILDING & INTERIOR
SOLUTION

MODERN architecture

The philosophy behind modern architecture is “form follows function,” meaning buildings should serve practical needs first, while maintaining beauty in simplicity. Sustainability, energy efficiency, and integration with the environment are also key aspects in contemporary modern architecture.

ABOUT US

ARCHI TEXTURE (architects & associates) is an architectural & structural designing company offering you fresh, creative and unique solutions for Architectural Planning, Interior Design, Exterior Design, Landscape, Customize Furniture, Structural Design & also Construction work.

OUR CLIENTS

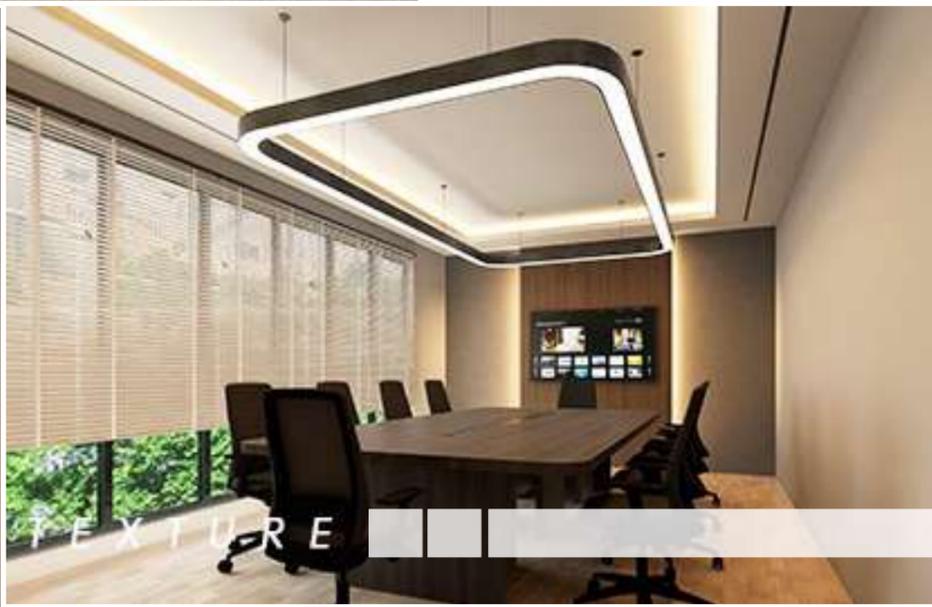

BEYOND BOUNDARISE

Our design emphasizes simplicity, functionality, and the use of new materials like steel, glass, and reinforced concrete. It rejects excessive ornamentation, favoring clean lines, open spaces, and geometric forms. Natural light, flat roofs, and large windows are common features.

INSIDE SPACE

Interior design plays a key role in how people experience a space—whether it's cozy, professional, luxurious, or minimal. It can influence mood, productivity, and lifestyle by arranging elements in harmony with both purpose and style.

STRUCTURAL DESIGN

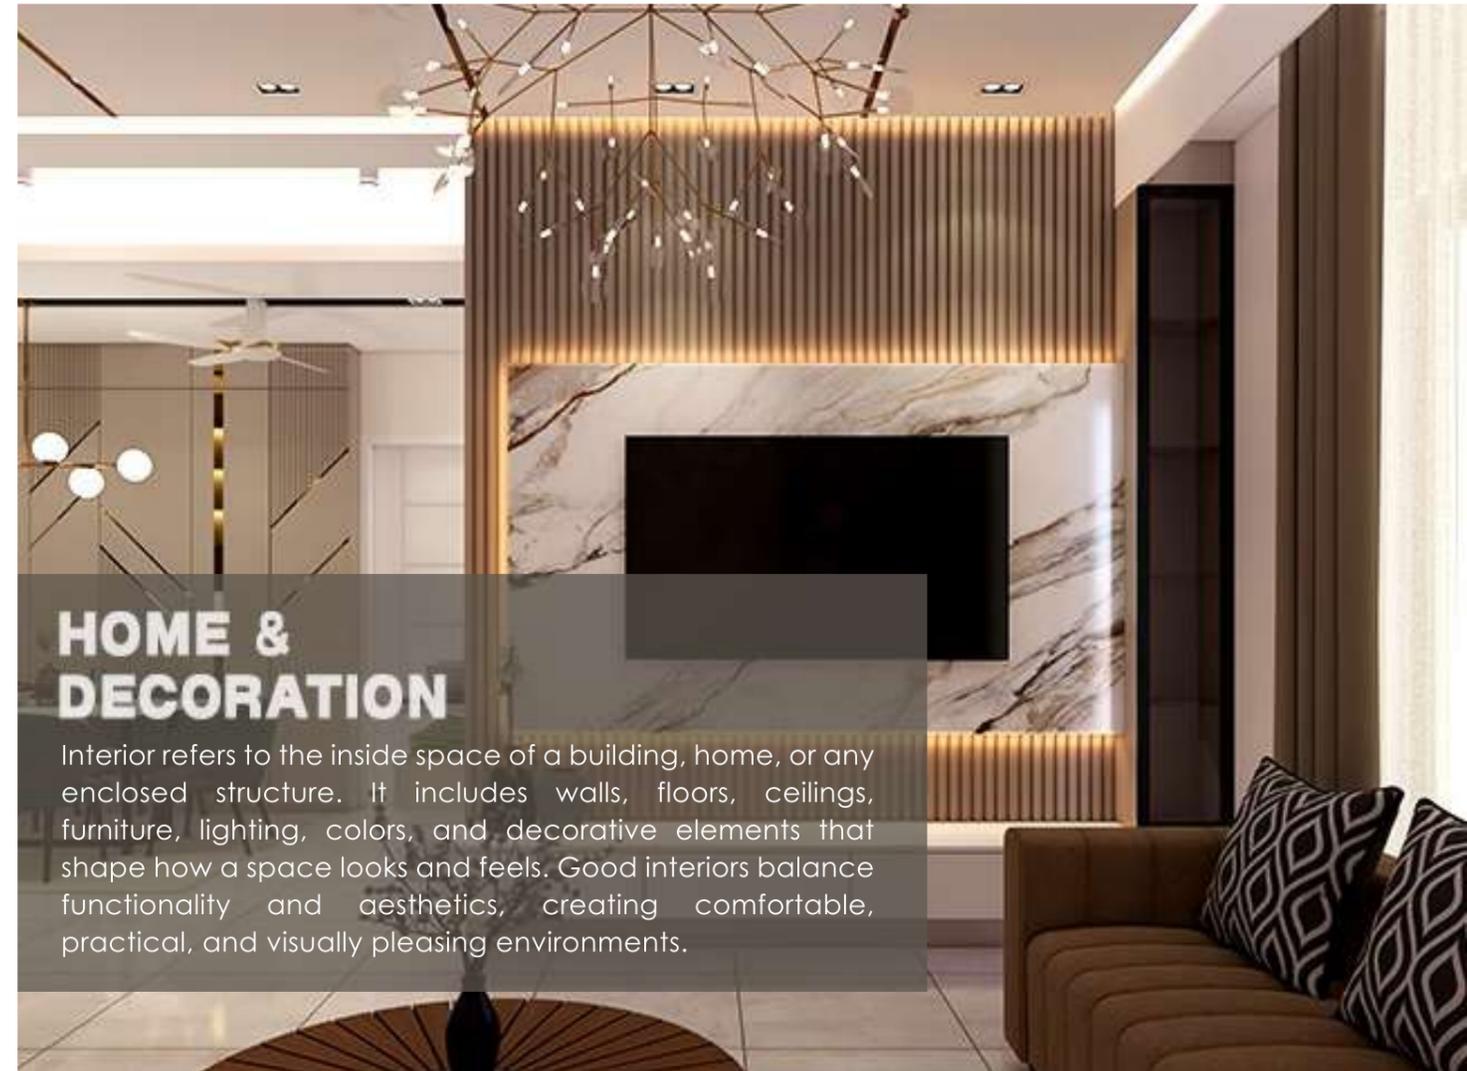

A good structural design balances aesthetics and practicality—it must protect against weather, ensure safety, and reflect the building's purpose or identity. Styles can range from modern minimalism with glass and steel to traditional designs with wood, stone, or brick.

EXTERIOR DESIGN

ARCHI TEXTURE

Exterior design is the art and science of shaping the outer appearance of a building or structure. It focuses on creating an attractive, functional, and durable outside look while blending with the environment. Key elements include facades, materials, colors, textures, windows, doors, roofs, and landscaping.

HOME & DECORATION

Interior refers to the inside space of a building, home, or any enclosed structure. It includes walls, floors, ceilings, furniture, lighting, colors, and decorative elements that shape how a space looks and feels. Good interiors balance functionality and aesthetics, creating comfortable, practical, and visually pleasing environments.

MODERN FURNITURE

INDOOR GREENERY

Indoor greenery refers to the use of plants and natural elements inside buildings to enhance health, beauty, and atmosphere. It brings a touch of nature indoors, making spaces feel fresh, calming, and lively. Popular choices include potted plants, hanging planters, vertical gardens, and terrariums.

Indoor greenery not only improves aesthetics but also has practical benefits: it purifies air, reduces stress, boosts mood, and increases productivity.

LANDSCAPE

Good landscaping connects nature with architecture, improves property value, supports sustainability, and provides relaxation areas. It can range from simple garden layouts to complex designs with modern hardscapes, vertical gardens, and eco-friendly solutions. It involves elements like plants, trees, lawns, pathways, water features, lighting, and outdoor structures to create balanced and inviting spaces.

MINIMALIST DESIGN

Minimalist interior design is a style that focuses on simplicity, functionality, and clean aesthetics. It emphasizes "less is more", using only essential furniture and décor while avoiding clutter. The design often features neutral color palettes, open spaces, simple lines, and natural light to create a calm and balanced atmosphere.
